

JANUS et Cie®

BEYOND TOPIARY

What Makes a Masterpiece?

Every design has behind it a distinctive story, a narrative of how it evolved from concept to reality. It begins with an idea, translated into a sketch and followed by rounds of exhausted production to bring to life one final, perfected outcome. All of our collections endure this intensive process, but our Masterpiece selections take it to an unparalleled level of excellence.

To earn a JANUS et Cie Masterpiece distinction, a design must begin with an impeccable balance of form and function, translated into exquisite composition. With this as its foundation, a Masterpiece is then engineered with the very finest materials and masterfully crafted by skilled artisans, employing time-honored traditions and flawless execution. Flawlessly executed and carefully imagined, these collections have been built to be cherished as family heirlooms for generations.

The title of 'Masterpiece' graces only the most extraordinary collections in our offering, including Wing, Boxwood, and The Masters Aluminum Series, a brilliant collaboration between Janice Feldman and Orlando Diaz-Azcuy, as well as Fibonacci, designed by the renowned Gabellini Sheppard. Additionally, the magnificent Eve Cast Bronze Apple holds this distinction.
