

JANUS et Cie®

BEYOND TOPIARY

Transcending the Boundaries of Form and Function with Precision and Beauty

A collection so meticulously constructed, Katchi complements the human form in a way that is enchanting, captivating. The result is sculptural seating, ingenious in both its ergonomics and visual appeal.

Designed by Janice Feldman, Katchi is an innovative, award-winning ensemble inspired by the Japanese concept that combines "Kata" meaning form, and "Chi" meaning magic. Katchi's contemporary shape influenced four new shades of JANUSfiber-Agave, Dolomite, Pewter, and Tungsten—each one a variegated, herringbone weave of colors. With an exceptional design and graceful curves, this collection is exceptionally suited for style-driven environments both indoors and out.

Beautifully imagined, Katchi's unique pitches and curves marry well with the Vino collection.
