BEYOND TOPIARY

An Homage to Fine Lines, Slant Shows all the Right Angles of Design

Inspired by architectural lines, the Slant collection's powder coated aluminum frames embrace linear design details to bring a tailored, clean look hospitality, contract, residential, and marine applications. Founder Janice Feldman designed the collection as a modern ensemble—geometric frames provide contemporary details while subtle tapering is reminiscent of mid-century modern elements. The graphic nature of the frame design, which extends beyond a chair's back and throughout the table bases, allow for the pieces to shine from 360 degrees.

Still, the visual interest goes beyond the furniture frames with the Slant collection. Specify beautiful, tempered glass or stone for dining table tops, and enjoy couture-like treatment of chair and sofa cushions, which feature a captivating darting detail unique to the collection.

For Slant's powder-coated aluminum frames, explore a palette of six sophisticated finish colors. Pair a neutral fabric with a neutral frame for a quiet, sophisticated look, or juxtapose the frame with a bright cushion to make a splash.
